

THV1022

2ch Buck/Boost Controller

General Description

THine's new 2ch Buck and Boost controller enables simple & low cost multi-channel power supply system design.

Ch-1 is Boost controller, ch-2 is Buck controller.

Both channels are PWM controllers and are designed to make phase compensation easy for output ceramic capacitors.

SS_1,2 and SCP pins help to design user defined soft start time, and timer latch delay time. Utilizing those pins and XP_GOOD1,P_GOOD2 the ensured sequence control can be easily set and linked to the external circuit.

This IC is suitable for power supply system of TFT LCD bias.

Features

- •TSSOP 16Pin package
- •Input Voltage range: 4.2 to 20.0V
- •Push Pull output for direct Power Mos driving
- •Optimized for Ceramic output capacitor
- •Complete PWM mode controller
- •Adjustable switching frequency 200kH to 800KHz by external resister
- •Timer Latch Protection
- •UVLO Function
- •Adjustable Soft Start time by external capacitor
- Adjustable Timer Latch Delay time by external capacitor
- •Ch-1 is fixed Boost controller
- •Ch-2 is fixed Buck controller

Applications

• TFT LCD Bias voltage supply

• General equipment

<u>Pin Assignment</u>

TSSOP 16P

			1
1	RT	VREF	16
2	SGND	SCP	15
3	SS_1	SS_2	14
4	INV_1	INV_2	13
5	FB_1	FB_2	12
6	VCC	OUT_2	11
7	XP_GOOD1	P_GOOD2	10
8	OUT_1	PGND	9
