Feature Details

Protection

To meet the requirements of a public environment, the front panel of PPC-154T complies with the IP65/NEMA 4 protection standards. Furthermore, the watchdog timer and power management features make the system secure and stable. The onboard hardware monitoring feature provides automatic protection that prevents the CPU from becoming overheated.

Networking

Two serial ports and a 10/100Base-T Ethernet port (Gigabit optional) give the PPC-154T advanced networking capabilities, and provide a great solution for versatile applications.

Easy Maintenance

Maintaining and replacing the LCD and touchscreen are made easier through the PPC-154T's modular design. In order to replace a defective LCD or touchscreen, one merely needs to remove the front cover and LCD bracket instead of disassembling the whole system.

Touchscreen Options

Customers can choose from three optional types of touchscreens: Resistive change to Infrared capacitive and SAW (Surface Acoustic Wave). These options make the PPC-154T a more user-friendly interface for different environments.
