

# USB3.0 Host Controller *μ***PD720201/***μ***PD720202**

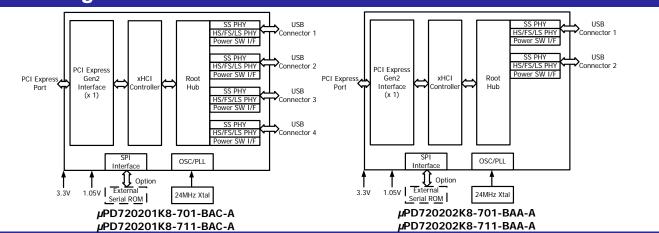

The  $\mu$ PD720201 and  $\mu$ PD720202 are the third generation Universal Serial Bus 3.0 host controllers, which comply with the Universal Serial Bus 3.0 Specification, and Intel's eXtensible Host Controller Interface (xHCI). The  $\mu$ PD720201 supports up to four USB3.0 SuperSpeed ports and  $\mu$ PD720202 supports up to two USB3.0 SuperSpeed ports.

The  $\mu$ PD720201 and  $\mu$ PD720202 use a PCI Express® Gen 2 system interface bus allowing system designers to easily add up to four ( $\mu$ PD720201) or two ( $\mu$ PD720202) USB3.0 SuperSpeed ports to systems containing the PCI Express bus interface. When connected to USB 3.0-compliant peripherals, the  $\mu$ PD720201 and  $\mu$ PD720202 can transfer information at clock speeds of up to 5 Gbps. The  $\mu$ PD720201 and  $\mu$ PD720202 and USB 3.0 standard are fully compliant and backward compatible with the previous USB2.0 Standard. The new USB 3.0 standard supports data transfer speeds up to ten times faster than those of the previous generation USB2.0 standard, enabling quick and efficient transfers of large amount of information.

#### **Block Diagram**

USB 3.0 Host Controller µPD720201/µPD720202 Specification

- Differences with the second generation µPD720200A
  - Improved effective throughput
  - Improved power consumption
  - Adopted small size package
- μPD720202K8-701-BAC-A (Ta:0 ~ 85°C) &
- μPD720202K8-711-BAC-A (Ta : -40 ~ 85°C) Features > 4 USB downstream ports
- 68-pin QFN, 8mm x 8mm
- μPD720202K8-701-BAA-A (Ta : 0 ~ 85°C) &
- µPD720202K8-711-BAA-A (Ta : -40 ~ 85°C) Features ≥ 2 USB downstream ports
  - > 48-pin QFN, 7mm x 7mm

- **Common Features** 
  - Universal Serial Bus 3.0 specification Revision 1.0
  - PCI Express Base Specification Revision 2.0
  - Intel's eXtensible Host Controller Interface (xHCI) Specification Revision 1.0
  - PCI Express Card Electromechanical Specification Revision 2.0
  - PCI Bus Power Management Interface Specification Revision 1.2
  - USB Battery Charging Specification Revision 1.2
  - Supports USB legacy function
- > Supports Serial Peripheral Interface (SPI) type ROM for Firmware
- Supports Firmware Download Interface from system BIOS
- System clock : 24MHz crystal
- 3.3V and 1.05V Power supply

#### **Target System**

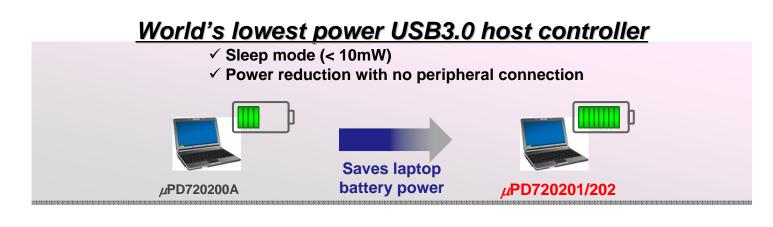

Desktop and Laptop computers, Tablet, Server
 PCI Express Card / Express Card
 Digital TV, Set-Top-Box, BD Player/Recorder
 Media Player, Digital Audio systems
 Projector, Multi Function Printer

Storage, Router, NAS, etc

 Document No. R19PF0043EJ0200 (Rev. 2.00)
 Renesas Electronics Corporation www.renesas.com

### Higher performance data transfer

## Space-saving QFN package and easy PCB layout

## Supports firmware download from system BIOS

#### **Renesas Electronics Corporation**

#### Notes

- es: Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation of these circuits, software, and information in the design of your equipment. Renesas Electronics assumes no responsibility for any losses incurred by you or third parties arising from the use of these circuits, software, or information. Renesas Electronics has used reasonable care in preparing the information included in this document, but Renesas Electronics does not warrant that such information is error free. Renesas Electronics assumes no liability whatsoever for any damages incurred by you resulting from errors in or omissions from the information included herein. Renesas Electronics does not assume any liability for infringement of patents, copyrights, or other intellectual property rights of third parties by or arising from the use of Renesas Electronics products or tabability therease the reasonable care in preparing the information included herein.

- others. You should not alter, modify, copy, or otherwise misappropriate any Renesas Elect tronics product, whether in whole or in part. Renesas Electronics assumes no responsibility for any losses incurred by you or third parties arising from such alteration, modification, copy or otherwise misappropriation of Renesas Electronics product. Renesas Electronics products are classified according to the following two quality grades: "Standard" and "High Quality". The recommended applications for each Renesas Electronics product are classified according to the following two quality grades: "Standard" and "High Quality". The recommended applications for each Renesas Electronics product depends on the product's quality grade, as indicated below. "Standard": Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; pe rsonal electronic equipment; audindustrial robots etc. "High Quality": Transportation equipment (automobiles, trains, ships, etc.); tra ffic control systems; anti-disaster systems; anti-crime systems; and safety equi pment etc. Renesas Electronics products are neither intended nor authorized for use in products or systems that may pose a direct threat to human life or bodily inpury (artificial life support devices or systems, surgical implantations etc.), or may cause serious property damages (nuclear reactor control systems; military equipment etc.). You must check the quality grade of each Renesas Electronics product ber using it in a particular application. You may not use any Renesas Electronics product for which it is not intended. Renesas Electronics shall not be in any way liable for any damages or losses incurred by you or third parties arising from the use of any Renesas Electronics product for Which the product short hereas Electronics.
